PROFILE

Serving your needs across the lifespan, our practice is a private clinic that offers psychological services by regulated psychologists. The mission of Dr. S. Gerald Hann Psychological Services is to promote improved mental health for individuals, families and the community using empirically based and scientifically proven assessment and treatment techniques. At Dr. S. Gerald Hann Psychological Services it is our belief that working collaboratively provides you with the best possible service.

Making the decision to see a psychologist can be difficult. We realize that you are seeking effective, comprehensive & time-limited solutions to your problem. As a clinical team, we offer a full range of psychological services. Whether you are seeking child, adolescent, adult, family, couple therapy or assessment services, we can provide the necessary support. With over 50 years of combined experience we have the skills, training & knowledge to assist you. Our clinical team members are all registered/candidate registered psychologists, who individually & collectively, are dedicated to offering you or your loved ones a wide range of professional services. S Gerald Hann, MASP, EdD, Director of Dr. S. Gerald Hann Psychological Services is a psychologist who specializes in the treatment of school aged children, couples, & families. He has a doctorate in educational and school psychology specializing in family and school relations. He also has extensive experience and training in the psychological assessment of children, adults and families. Dr. Hann also specializes in Intensive Short-Term Dynamic Psychotherapy (ISTDP) with young adults and adults. ISTDP is a unique form of psychodynamic treatment that brings about rapid reduction and/or elimination of a broad spectrum of emotional symptoms, including physical symptoms which are thought to be related to emotional factors. ISTDP interventions are specifically designed to resolve anxiety, depression, somatization and personality disorders, as well as alleviate a variety of self-defeating behaviors, many of which derive from unstable or troubled early life attachments (For more information see: ISTDP.CA).
